1. MANUFACTURES.

Definition of Factory.—A factory for statistical purposes is an industrial establishment in which four or more workers are employed or in which mechanical power is used.

Average Number of Workers.—This information has been compiled in two ways—(a) average number over the whole year, i.e., the number of persons required for a full twelve months to do the work actually done by individual factories during the periods they were operating; and (b) average number over the period of operation, i.e., the sum of the figures for individual factories of the average number of persons working during the period the factory operated.

Value of Output.—This represents the selling value at the factory of all products manufactured during the year, whether sold or held in stock.

Value of Production.—This figure is arrived at by deducting from the value of output the cost of raw materials, containers, fuel, light, power, oil, water, tools replaced, and repairs to buildings and plant. It has been agreed upon by the Australian Statisticians as being the best estimate at present obtainable of the contribution of factories to national wealth production. It is still subject to deductions for depreciation, and for postage, advertising, and similar expenses. Subject to these deductions, it represents the fund which provides wages and salaries, profits, interest, and rent.

Table No. 1.

SUMMARY OF FACTORY STATISTICS.

(NOTE.—In this table heat, light, and power factories (Class 16) are included.)

PARTICULARS.	1941-42.	1942-43.	1943-44.	1944-45.	1945-46.

VALUE OF PRODUCTION PER WORKER .. £	401	452	467	482	462
VALUE OF PRODUCTION PER HEAD OF MEAN POPULATION £	23.96	27.92	28.68	28.92	27.92

^a FIGURES ON LINES MARKED THUS REFER TO, OR ARE DEPENDENT UPON, ^a AVERAGE NUMBER OF HANDS EMPLOYED OVER THE WHOLE YEAR.

^b FIGURES ON LINES MARKED THUS REFER TO AVERAGE NUMBER OF ^{workers} HANDS OVER THE PERIOD DURING WHICH THE FACTORY WAS IN OPERATION.

^c EXCLUDING DRAWINGS BY WORKING PROPRIETORS.

^d BOOK VALUES, LESS ANY DEPRECIATION RESERVE IN RESPECT OF THEM, AS STATED BY FACTORY PROPRIETORS.

^e EXCLUDING ELECTRIC MOTORS (58,478 H.P. IN 1945-46) USED IN FACTORIES WHERE THE ELECTRICITY WAS GENERATED BY THEMSELVES. THE PRIME MOVERS ONLY ARE INCLUDED.

^f THE AMOUNT OF DEPRECIATION ON BUILDINGS, MACHINERY AND PLANT, AS STATED ON RETURNS, WAS £1,523,295 FOR 1945-46.

a. In addition to the figures shown, there were engines of 5.330 H.P. driven by water power (in electricity stations) and electric motors of 58,478 H.P., used in factories where the electricity was generated by themselves. In the latter case, the prime movers only were included.
b. Book values, at end of year, less any depreciation reserve in respect of them, as stated by factory proprietors.

a In addition to the figures shown, there were engines of 5,630 H.P. driven by water power (in electricity stations), and electric motors of 58,562 H.P. used in factories where the electricity was generated by themselves. In the latter case, the prime movers only were included.

b Book values, at end of year, less any depreciation reserve in respect of them, as stated by factory proprietors.
